Vladimir Syromyatnikov
SAFETY By Design

AWARD NOMINATION FORM

AWARD CRITERIA

The nominee is an individual who is or has been working, for a large part of their career, full time in the design of space systems and/or in design safety certification. He/she has shown outstanding support and dedication to space safety and achieved national and/or international recognition. The award may be assigned to an individual or to a group of individuals who have been closely cooperating.

The nominee shall meet at least two of the following criteria:

1. Documented professional involvement in space systems design and/or design safety certification for at least 15 years;
2. Inventor or designer who through one or more outstanding patent or conceptual design innovation contributed to make space systems (including related equipment or payloads) safer;
3. Significant participation to the development of design solutions which have proven to possess a higher degree of safety;
4. Significant participation to the development of safety technical requirements, and/or safety reviews organisation and methods, which have been proven effective in ensuring a high degree of safety;
5. Author of books, papers and/or articles who promoted novel concepts and ideas which greatly contributed to advance the understanding and implementation of safety-by-design;
6. Inspiring leader in promoting safety related education and/or international cooperation.

RATIONALE for AWARD

Describe how the nominee meets the award criteria:

- Provide appropriate documentation, as necessary, supporting the nomination.
- If the nomination is based on published works, provide copies of the document(s) or electronic links, which would enable the committee to obtain/view, the works.
